

I need a bigger net.

For most humans, this is more than enough to keep them away, but unfortunately there are a few determined hunters who are extra hard to get rid of.

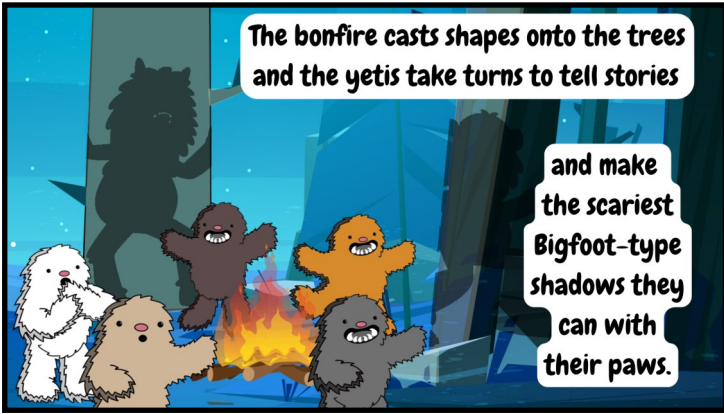

The yetis celebrate the HOODWINK with a YETI HULLABALOO, where they burn the paw log and dance all night.

ROAR!!

ROAR!!

ROARRR!!

The bonfire casts shapes onto the trees and the yetis take turns to tell stories

and make the scariest Bigfoot-type shadows they can with their paws.

They practise until they're SO good, they can make shadows even without a fire, using the Sun or the Moon.

AARRGH!!

Which comes in REALLY handy when those pesky hunters get too close for comfort!

Hee, hee, hee!

Shhhhh!

YETI SHADOW PUPPETS

Ask your grown-up to help you cut out these yeti shadow puppets and stick them onto a billy stick or an old pencil. Try to make a room as dark as you can and shine a torch behind the yetis to see their shadows appear on the walls. You can make them grow or shrink by moving them closer and further away from your walls - just like the yetis of The Hoodwink Hullabaloo!
